Work

Senior Web Developer • Rubrikk Group AS

2022 - Present

- Implemented a complex module system into the project, making it easier for the whole team to add new features and work on them in parallel; also reduced the complexity and clutter of some files because code was moved to their own modules;
- Working on the company's portals: adding new features and maintaining them. Assuring that the performance of the websites is maximized in Google's Lighthouse tool.

Freelancer

2017 - Present

- Created [PanoroCRM](#), a CRM application created for real estate agencies with modules for managing offers, publishing them to different portals, analytics, module for managing contacts, and other modules. The application's backend is constructed as microservices for easy scaling when required;
- Created different web applications for real estate agencies, providing complete solutions from backend and frontend to releasing and maintaining applications like [imocentral.ro](#) and [panoro.ro](#).

Education

Babeş-Bolyai University (UBB)

2017-2019 // Cluj-Napoca, RO

Bachelor's Degree in Computer Science
